## Painters & Decorators

Welcome to Sydney Quality Painters Pty Ltd

Do you have some specific painting services in mind? Or is it regular painting services that you are seeking? Do you reside in the Sydney roundabouts? And are experience, quality and affordability your key criteria?

Well for all this and more, there is Sydney Quality Painters. We started over 15 years ago and it is a family-owned and operated painting services company and the founder, has over 20 years or more than 2 decades of experience in this field.

What are the main services rendered by Sydney Quality Painters, you may ask? Well, they are listed here below:

- Painting work for New Construction
- Repainting and redecorating for older buildings/homes
- Interior Painting
- Exterior Painting
- Textured Coatings
- Industrial Painting
- Architectural Coatings
- Anti-graffiti Application
- Spray paint Application

The one thing we can say is that we take on some usual, common painting services and we also offer some exclusive, rare painting services too. But whatever work we have been given or assigned, it is work that will always leave an everlasting impression.

And we have to make a mention here, we use only Dulux products.

### Services

When it comes to the painting services offered by Sydney Quality Painters, the same are listed below:

- New Construction Painting
- Repainting and redecorating for older homes and buildings
- Interior Painting
- Exterior Painting
- Textured Coatings
- Industrial Painting
- Architectural Coatings
- Anti-graffiti Application
- Spray paint Application

## Architectural Coatings

Essentially, you may ask what Architectural Coatings are. Well, it is a covering for the surface and they can either be decorative paint, a coating that is used or added for some specific purpose. They are resorted to many a time or opted for because they offer that appealing touch and add a dash of decorative flavour, but in addition to that it also has functions as in, it is long-lasting and protective by nature. And it is resistant to moisture, UV rays or even general degrading. In a way, if you decide to go in for architectural coatings, for the walls in your home or building, in a way it is a right move.

The same are applied with the aid of sprayers, brushes, and rollers. But just so you, do not mistake varnishes or lacquers as part of the architectural coatings, they are different and do not come under this.

You can opt for this to improve the overall look and feel or to add to the appeal, either way, it is a good choice. And Sydney Quality Painters offer this as one of their primary services.

## Anti-graffiti Coating

When we say anti-graffiti coating, we mean it is a type of coating that does not let any graffiti art or paint to stick or bond to the surface or wall, where the graffiti art is even attempted. This way, unknown to you or unnoticed, the exterior walls of either your residence, commercial building, office space or say even a public building or monument stays protected and the graffiti art does not hold or bond thanks to the anti-graffiti coating you have used on the exterior walls and fencing.

With anti-graffiti coating any type of defacing or spoiling of the walls and structure can be avoided and there are different types of coatings that come under this and you can opt for any that is best suited to you or required. And the common types of coating used are sacrificial coating and permanent coating and we at Sydney Quality Painters do just that or determine which to go in for.

## Spray paint Application

Just to let you know, spray painting is a method, practice or even a technique wherein a coat of paint, varnish, stain or whatever it is you want sprayed on the walls, is sprayed by way of using a sprayer or a can or equipment that lets one carry out the spray paint application to the required and desired effect. In effect, there are spray guns also that can be used for this. Spray paint application is best to be used on large surfaces and also to give a uniform effect when the painting or coating is being applied.

## Textured Coatings

Textured coatings are used anywhere on a building's exterior or interiors. Basically, yes it is good for the inside or the outside. These coatings are made of first-rate acrylic latex coatings that are added on to the wall surfaces so as to give the finish of your choice and not just that, the whole look and feel should be so.

If you go in for textured coatings, you need not go in for wallpaper or even boards on the wall to render a particular effect you are seeking in any area or space in the house or say even a in a room.

Textured coatings are a sure shot way to bring in that aura to the space, and it is also durable and it can take care of any imperfections on the wall, here and there. And not just that, they bring in character to the space and that is just something that has to be experienced.

### Interior and Exterior painting

Sydney Quality Painters carry out extensive interior and exterior painting work for both domestic and commercial customers'. And it is not just painting but we also take care of decorative finishes, textured painting, textured effects, and any type of coating work too. So for your home, office or any building, if you want painting work or some specific painting services, we are good for that.

### New construction painting and repainting

For both older and newer buildings we offer a range of painting services. So for all new constructions, be it a home or commercial space, if you are looking at end-to-end painting services, we are good for that. And this would include interior, exterior painting, decorative finishes, coating and more.

Similarly, if it is an older home or for the place you reside in, if a painting service is due and much needed, we carry out repainting work too and we will carry out whatever work is needed and more.
