

# Everything Web Perth

## Web Design & Development

Old Fashioned Service with Cutting Edge Technology!

As a website design company with over 25 years experience we will deliver on our promises. You'll receive a professional website design just as you would expect and more importantly, service. But it doesn't end there, we will also go to the trouble to give you valuable intel on your direct competition and create a web strategy going forward to show you how your business can succeed on the internet, how you can get on top of your competition and how you can drive quality, qualified leads to your business. If that isn't enough, we will do all this by talking to you in plain english, listening to your web needs, and working with you as a web partner.

Are you in a cold sweat over whether you'll get what you pay for from a Perth Website Design company? We'll walk you through the entire process explaining everything in plain english, always giving you options so you can make an educated decision about your web design. You'll walk away from our meeting actually knowing what we discussed and the reasons behind the decisions you've made. We can custom make any website your business needs from landing pages, mobile websites, business websites and e-commerce websites. Our lead in custom package starts from \$4300 + GST.

Why Choose Everything Web Perth?

No ongoing license fees

You'll have full ownership of your website

No lock-in contracts

Purchase outright or ask about our website rental option

Deal with an Australian 100% owned business

24/7 support in Western Australia

### **Be Seen Today!**

We understand today's SEO methodologies as we have been doing SEO since 1992 and certainly won't risk any of our clients being delisted. We conform to Google's recommendations and are abreast of the latest news and advancements regarding SEO. We don't take shortcuts, and the methods we use will not only rank you but solidify your ranking so you can remain in front of your competitors. As a responsible Perth SEO company

we're not going to make you unsubstantiated guarantees like "we guarantee we will get you onto the front page of Google in..." which is insane considering the fact that we don't own Google or have any control over Google so how can anyone make these sort of claims?

What we will promise you, and back it up, is that we will increase the amount of targeted traffic you receive and improve the quality of leads your website collects for your business. In short, we will drive more qualified leads to your business website and increase the number of ways the public can find your business.
