It's hard to find words to say how delighted I am with the new design of my website. Your flair, talent, creative ability and immediate understanding of the 'mood' and 'feel' I wanted to portray has surpassed all my highest expectations! And apart from that, I have to say thank you, very much, for always being so prompt in responding to any requests for modification, technical issues and everything else that went with this big job. Completed on time, no hitches or glitches, a smooth transition from one host to another... the utmost in professional collaboration. Fantastic! You're a star. You deserve much success in your business and I wish you that. Thank you from the heart.

Why should you consider a Content Management System?

WHY SHOULD YOU CONSIDER A CONTENT MANAGEMENT SYSTEM?

Clients need to be able to make the most of the websites we design, so to help them achieve this we use Joomla! We have found their CMS to be the best content management system around and it can be easily built upon to increase functionality. CheDesigns have developed both small and large websites using the Joomla's platform, and all client's find their sites easy to update.

The CMS is a revolutionary system which allows users to update their website with ease, and make changes live on their web pages. It also allows us as a web design firm, to create modern and professional dynamic websites that will rank better on search engines like Google; this enables us to make websites that function for a forever growing world.

We can integrate any 3rd party add-on to make it suit your plans exactly. Equally, if you have a unique requirement we can also create custom made components to your exact specification.

Easy to use!
