Computer Consultant

About Us

Harika Technology

Harika is your source of IT expertise in Perth. With deep experience in creating and integrating technology solutions across many industries, as well as extensive IT management experience, we have the skills to solve your IT problems and help you to make the most of the growth opportunities technology can provide.

We'll help you to clarify your IT requirements and show you how to get what you need, done properly, on time and at the best price.

Privacy

Our privacy policy is simple. We won't share your information with anyone without your explicit permission. Whether or not we have an NDA in place, your confidential information and intellectual property will be protected.

Ethics

When we analyse your requirements, we'll give advice without fear or favour, based on our years of experience in IT and business.

Our goal is to help you build a solution that works for you, and meets your needs for the long-term.

Services

IT requirements analysis

Harika Technology will work with you to analyse your needs and provide a comprehensive plan to get your systems up to speed. Optionally, we can help you to implement the plan using our strong relationships with local suppliers to get you the right solutions at the right cost.

Business continuity

We'll aid you in your disaster recovery planning. We can provide offsite backup and replication.

Communications

We can facilitate your data and telephony purchases, installations and upgrades. We'll ensure you get competitive pricing from the major infrastructure providers.

This includes Internet connections, private networks, IP Telephony (installed or hosted online) and your mobile fleet.

Email and Web

We can provide web and email hosting, managed email and email archiving.

Hardware maintenance

24x7 maintenance services for your IBM and HP servers and Cisco network equipment with guaranteed spares on-hand and qualified engineers always available. We'll keep your hardware running, during and after the warranty period.

Help desk

IT Help Desk services are available at all levels. Use us as your primary help desk, or to handle your after-hours or overflow calls.

Management

With extensive experience in IT Management, we can support your IT team or provide advice when recruiting technical staff or selecting a technology provider.
