

Zounis Constructions

Building Renovation

About

Zounis Constructions was built on a foundation of family values, quality workmanship and taking pride in a job well done. With years of experience combined with exceptional communication and a focus on service, the team at Zounis Constructions offer a personalized service to help you build your vision.

Leading Zounis Constructions team is Phil with over 10years' experience in building

Phil and the team have instilled the importance of paying attention to the detail and quality checking each stage of the project to ensure everyone involved is proud of the finished piece. What's equally important to the team is keeping communications open and being available for questions or discussions.

This is why all clients will have Phil's direct phone number and will always be able to get in touch with them either on the phone or on-site. Yep, Phil spends his time on site and on the tools with the build team, not stuck behind a desk because he likes to be involved every step of the way.

[Contact](#) Phil and the Zounis Constuctions team for all kinds of new home construction projects and meet with them for an obligation-free consultation to discuss your needs.

Our Process

Stage 1. Initial Consultation

During your initial consultation, we will listen to understand your needs, wants, design concepts and budgets.

Stage 2. Preliminary Agreement

Once we have agreed to move to the next step then a preliminary agreement will be drawn up relevant to your current project status so that we can engage our team to create the building documentation from concept sketching to working drawings and structural plans

Stage 3. Cost Analysis

Once all required documentation is held and cross checked then we will provide a detailed estimate along with a 3D model render to provide a sneak preview of your unique new home

Stage 4. Contracts

Master Builders building contract and specification documents will then be prepared for signing along with the confirmation of all final working drawings, engineering and specification selections.

Stage 5. Construction

Upon construction commencement you will be introduced to further members of our team, each committed to ensuring your dream home building experience will be a rewarding and exciting time. Regular site meetings and discussions with builder will create an agenda whereby we consider each important detail during the building program and achieve an outcome that we can all be proud of for many years to come.

Stage 6. Completion

Site meeting and inspection with builder and site manager 10 days prior to official handover to complete a pre final inspection is conducted with our quality assurance checklist as our working document. Final inspection on handover date with builder and a full tour of the home to ensure that you are comfortable in operation all of your new gadgets.
