Our customers' needs are extremely important to us. Every customer is offered an array of choices in relation to colors and finishes.

We strive to not only meet but exceed customer expectations

We cover the entire Brisbane region from Ipswich to Redland Bay, from Caboolture to Logan and further, we will travel the distance at no extra cost to you.

OUR SERVICES

PREPARATION

The end result of every project is only as good as the preparation. We will make the necessary repairs including filling holes with the matching color and punching nails.

SANDING

Sanding a timber floor is an art form which should not be attempted by an amateur. Floor sanding machines can be difficult to control and with just one slip you could be left with a very difficult to repair gouge in your floor. Why take the risk when you can have a master floor sander take your floor back to a smooth flat finish. Surfaces which we can sand include tongue & groove, parquetry, cork, ply and overlay.

STAINING TIMBER

When staining a floor the color must always be darker than the original timber color. To make the timber lighter it must be done using a white wash. Where floorboards are made from different timber or newer replaced timber boards the color will not exactly match unless we use a dark colored stain. The color of the stained timber will darken when the clear is applied.

FINISHES

We use the only highest quality polyurethanes to ensure maximum lifetime and appearance under heavy foot traffic conditions. Available in Satin, Gloss or High Gloss finish in water based for low odor and easy recoating, moisture cured for high durability or 2 component mixes for ultra high durability.

QUOTES

We will provide a swift quote upon request immediately after visiting the site. These quotes will be firm and without hidden charges. We can also provide a rough quote when supplied the measurements and condition of the floor along with a few photos by email. Email quotes will then be confirmed after viewing the site if requested.

DOMESTIC OR COMMERCIAL

No job is too big or too small. From basketball courts and stages to little old Queenslanders, new floors or renovated oldies, we will sand them all.

RECOATING OR POLISHING

Sometimes it's called a maintenance coat. A cost effective way to rejuvenate your timber floors if they are looking a bit tired without having to re-sand. We lightly sand and then apply one or two coats of polyurethane. This procedure cannot be done where the coating has been worn through to bare timber, in this situation we will need to do complete sand and recoat.

ALL WORK GUARANTEED!

As simple as that! All our work is guaranteed.
