### Hair color

J the colour is a more natural colouring alternative made from sweet Almond Oil making it a gentle option for the hair and scalp.

J the colour is a more natural colouring alternative made from sweet Almond Oil making it a gentle option for the hair and scalp. The colour has been formulated to accommodate sufferers of dandruff, psoriasis and / or scalp sensitivities. J colours are glossy and often leave the clients hair feeling more like they've had a treatment than a colour.

Cureplex/ colorplex ~ can be added to colours to protect the hair even further.

\* extra \$10 Approx

\* no additional processing time

We have both products. Scientifically formulated using a naturally derived vegetable protein molecule that penetrates the hair, reinforcing bonds during the colour and bleach process making hair 4 times stronger and reducing breakage.
