

Coastal Solar Sunshine Coast

Solar Energy Equipment

We're About Performance, Safety and Economy

Coastal Solar offer high quality design, sales and installations of domestic grid connected solar systems and hybrid solar systems (grid connected with battery storage) across the Sunshine Coast.

We use only the highest quality, locally sourced solar panels and inverters. This to deliver you the most optimal, safe and consistent domestic solar power performance available, in *the* most economical way possible.

Our focus is on delivering you optimum performance, safety and economy.

These are our 'Big 3'.

Our Process

Consultation

Firstly, we'll spend with you the time it takes to answer any questions or concerns you may have about powering your home with solar energy.

We take the time to understand your specific wants and needs. It's very important to us that we have a full understanding of your ideas and objectives around solar powering your home.

Once we have a full understanding of what-it-is you're looking to get from your solar system, we'll work together to determine the best system for your specific requirements and application taking into account our 'Big 3' that we insist on delivering to every Coastal Solar customer which are: Performance, Safety and Economy.

Our goal is also to see that your solar power system will be an asset to your home – adding tangible value to your home both now, and in the future.

Installation

Prior to installation, you'll receive a complete list of your solar system's specifications and the products that will be used so that you're fully informed about the work that's to be carried out on the day of your solar installation.

Your solar installation will typically take one day and is dependent on the weather. Wind and rain can be a hindrance.

We'll be sure to keep you fully informed on all aspects of your installation prior, during and on completion of your solar power installation.

After Sales Service

We'll be in touch with you periodically to ensure that your Coastal Solar system is running exactly as should.

You'll receive timely reminders from us regarding the maintenance of your system and occasional ideas for getting the absolute most out of your Coastal Solar system.

We look forward to an opportunity to talk to you about your solar plans.

Your Sunshine Coast Solar Professionals

Coastal Solar are here to deliver you **optimum performance, safety and economy** when it comes to your home's solar energy system.

You already know that solar powering your home is a wise initiative. And **Coastal Solar** will be with you as you see immediate savings on your power bill. But that's just the beginning.

Because **Coastal Solar** only use the highest quality industry-leading solar panels and inverters from trusted brands such as Fronius, Rasol, Sungrow, Risen and SMA, you'll also be enjoying the best and latest technology available.

A Secure and Economical Investment

With **Coastal Solar**, your home's solar power system is a secure and economical investment - set to consistently deliver you maximum performance and efficiency for years to come.

Coastal Solar's solar systems have proven to deliver home owners across the Sunshine Coast outstanding results as well as the fantastic feeling of making a real and significant contribution to preserving our environment through the reduction of Co2 emissions.

Customer Testimonials

"I couldn't be happier with the service I've received and I'll be recommending you to all my friends that are considering solar. Thanks.

Paul and Megan Mulrane"

"Thanks for the replacement Inverter. Craig from Coastal Solar was very professional and knowledgeable and helped us make an informed decision to get the right product for our Solar needs.

I would highly recommend Coastal Solar and the great service that they provide, and will happily use them in the future.

Stephen & Kerry Murray"

Our Promise

We promise to deliver on time, on budget and install your solar energy system with careful, expert precision and attention to detail.
