

Aestec Services

Building Excavation & Excavator Services

Our Mission

"To achieve maximum customer satisfaction through continuous improvement and reliable service"

Having serviced major clients in the region for numerous years, including Boyne Smelters Ltd, Cement Australia, Gladstone Area Water Board, Orica, Rio Tinto Yarwun, Gladstone Ports Corporation and Queensland Alumina Limited, our reputation as a safe and efficient service provider is synonymous with our business. The mutually beneficial relationships we establish with our clients ensure ongoing loyalty and the ability to anticipate needs and expectations.

Diverse organisational structure

We operate as a complete business. We are on multiple sites across the Gladstone region and we run as one complete unit. We have a centralised business unit, with dedicated site managers and the resources including plant, people, procedures and knowledge are shared between sites.

CONSTRUCTION

Aestec have completed many high profile and complex projects including the South Gladstone Reservoir roof structure replacement, new state of the art laboratory building at Cement Australia, Bechtel Warehouse, new hot metal laydown yard for Boyne Smelters, and numerous other large projects for industrial companies.

Aestec can supply the client with a full-service team of designer/ builders, estimators, project managers, superintendents and field tradesmen. The company consistently completes projects on time and within budget, with an attention to detail and period accuracy that has impressed and satisfied our clients time and time again.
