A OK Security

Security Alarms & CCTV Cameras

A-OK SECURITY SPECIALISES IN: Alarms/Security Systems • CCTV • Intercoms •

As technology advances, equipment that was once unaffordable, is now less expensive than you think! Unfortunately, as population densities increase, so does crime and other social issues.

Security for the domestic market is a must and is even more important for families that have young children.

ARE YOU A PARENT, BUSINESS OWNER, OR GREY NOMAD?

Our security systems offer 100% piece of mind.

Business owners: Protecting your employees, stock, and premises is vitally important. Looking back at my installations we have covered every industry. These include accommodation, manufacturing, distribution, retail outlets, medical practitioners, childcare and fast food, to mention a few!

When comparing the overall investment cost to the potential losses and risk, the ROI becomes insignificant.

Working together with a network of QLD security suppliers we can offer CCTV, alarms & intercoms systems at competitive prices.

WHAT IS BEST?

Ultimately it depends on what you want to achieve and what you are prepared to spend.

That being said, we don't recommend wasting your time, and money, with DIY systems. Although they do have a place in the market, we are often asked to replace them within the first year of operation as the reliability and picture quality does not meet expectations.

In addition the technology is advancing at an amazing rate so any quotation over 6 months old is probably "*outdated*" in our opinion!

As with everything there is "*nice to have*", "*should have*" and "*must have*".

A site visit is usually best to discuss your needs, options and cost.

DO YOU ALREADY HAVE A CCTV SYSTEM?

- Not happy with it's performance?
- Interested in adding cameras?

Please give us a call and we can discuss some options.

ALL ABOUT INTERCOMS

- Do you have a new installation?
- Do you need a new intercom?

Please call or email us your requirements.

Is your current intercom giving problems?

Please contact us to discuss an upgrade.

WHY UPGRADE?

An upgrade offers the following advantages:-

- It can be installed using your existing wiring to keep the installation cost low.
- It offers superior sound/image quality.
- Modern systems are better suited to the QLD weather than the older systems.
- They are generally more competitively priced (*esp. when replacing faulty components to keep a relic running*).
- It ensures reliable, trouble free, operations for years to come!

The installation is arguably more important than the equipment is!
If done incorrectly, or not to the Australian standards, the system will be compromised.

Our technicians are trained, licensed, insured, and use only quality products and components.

We offer an installation warranty as well as backup service and support.

- Security Licence # 3988273.
- \$ 20 million public liability insurance.

To ensure minimal disruption to you, your family, staff, or operations we can install or service day or night, weekdays or weekends!
