

ClimateLink Air Conditioning

Air Conditioner

About Us

ClimateLink is a family-owned and operated Brisbane and Gold Coast area Air Conditioning business.

Our business is founded on strong principles and values. We pride ourselves on our quality workmanship, friendly and professional customer service, expert design knowledge and the development of strong and trusted long-term relationships with our clients and customers. We provide quality service, maintenance, repair, and installations for all types of air conditioning systems, and we guarantee all of our work.

At Climatelink our technicians possess relevant licenses (QBCC and ARCTIC) and are fully insured that give you, our valued customer a piece of mind.

Among many air conditioning companies available to choose from, when you choose to work with ClimateLink, you can expect to be treated with the care and respect you deserve. We'll do what it takes to make your experience with us as positive as it can be.

Contact Us

Commercial

We ensure quality installations and maintenance in commercial office buildings, shopping centres, health care facilities, industrial facilities and schools across Brisbane and Gold Coast areas. As each commercial facility has its own unique air conditioning and operating characteristics, our team always works closely with our customers to understand individual requirements. We aim to deliver the highest level of service and support necessary to keep their systems operating in mint condition. You can ensure the comfort of your employees and/or customers with a system designed, installed or maintained by ClimateLink. With our vast knowledge and experience we will work with you to design, install or repair your air conditioning system.

Ducted Systems

Ducted air conditioning provides a discreet and unobtrusive way to effectively cool your home. The unit is located outdoors in a position where it is least noticeable. The unit fan motors circulate a regulated supply of cooled or heated air through ductwork and vents in the ceilings, floors or walls. This allows the cooled or heated air to be evenly distributed throughout the whole dwelling. Ducted air conditioning can offer you even more. With Advantage Air's, air distribution system you can separately control up to 10 zones in your

house from a wall mounted tablet, located at the most convenient location in your home. In addition to this feature, your smart phone doubles as your personal remote control, allowing you to adjust and control the temperature from anywhere in the world if you have internet connection.

Split Systems

The split system air conditioner is the popular choice for most buyers. They are ideal for cooling smaller areas. Split system air conditioners are generally easy to install, have minimal installation costs and are efficient to run. Split system reverse cycle units also offer both cooling and heating functions, which suits the varying temperatures we experience here in Brisbane.
