Pest Control, Termite Management Programs

## Chemical Barriers and Bait Boxes

At Termini-Tator Pest Control, we have over 15 years of knowledge, skill and expertise to help you with your pest problems. We're familiar with the unique local conditions and contributing factors that lead to infestations. With regular inspections and annual treatment you can rest assured that your home or business will be free from pests and vermin, such as termites, fleas, rats, cockroaches, spiders, ants, silverfish and more. The best part is, we offer competitive rates and friendly customer service. You'll love the feeling of cleanliness and hygiene you get with a pest-free home.

All of our treatments are done to Australian standards and we offer our pest control services in the following areas.

- [Ipswich](#)
- [Ipswich](#)
- Brisbane
- Brisbane
- [Gold Coast](#)
- [Gold Coast](#)
- The Gap
- The Gap

Our professional team will come up with a solution that works for you and your family (/business). Whether you need residential or commercial services, Termi-Nator is who you should turn to when you want guaranteed results.

If you have any further questions about our range of pest management services, please do not hesitate to contact us now on 3201 4474 or on 0427 022 070. Are you trying to call us outside of office hours? Then please fill in our quick and easy online enquiry form and one of our friendly staff member will get back to you shortly.

Whenever you need expert pest management in Ipswich, Raceview, Brassall, Redbank Plains, Forest Lake, Booval or around Queensland, choose the best, Termi-Nator Pest Control.

## **White Ant Control for Forest Lake Properties**

Forest Lake boasts a wide variety of different homes, including classic timber designs such as bungalows, cottages and Queenslanders. Timber is also a popular material for decks and verandahs, which are almost ubiquitous around Forest Lake thanks to the many parcels of sloping land and the year-round sunny weather.

Unfortunately, timber is also very susceptible to white ant damage. If you're lucky enough to call one of these properties home, and want to protect your timber frame, cladding, flooring etc., call Termi-Nator.

We are leaders in white ant management for Forest Lake properties because we offer great results, competitive prices, and friendly service. Our professional white ant control team can come to your property and assess your infestation in a matter of minutes.

They'll be able to provide a comprehensive report, as well as recommended options for eliminating white ants and making sure they don't come back. From pesticides and electrical barriers to physical barriers, there are a variety of options to suit different properties. We understand that each homeowner has their own concerns regarding safety and eco-friendliness, so we'll work with you to make sure you're comfortable and well informed about the process.

As well as serving owner-occupiers, we are also available to help renters, real estate agents, landlords, and commercial property managers.

White ants can cause thousands of dollars' worth of damage to buildings in terms of repair and replacement costs. It's worth getting regular inspections and, if necessary, treatment advice; it could save you a lot of money in the long term. Termi-Nator offers excellent competitive rates on inspections.

For extra details on white ant management for your Forest Lake home or business, call 0427 022 070 now.

## **German Cockroach**

The German Cockroach, which originally came from Africa, is the smallest of the pest species.

Size range

1.5 cm

Distribution

The German Cockroach is found throughout Australia.

Habitat

The German Cockroach is the hardest pest cockroach to get rid of and is the most troublesome in Sydney. It can be found anywhere in the home but is probably most common in the kitchen, frequently inside cupboards, drawers and electrical appliances.

#### Feeding and Diet

The German Cockroach eats almost anything but prefers starchy foods like potatoes, rice and cereal.

#### Other behaviours and adaptations

The German Cockroach is also the most sociable of the pest species and is often found in large groups, especially near warm areas like water heaters.

#### Life cycle

Females carry an egg capsule containing 30 – 48 eggs at the end of their abdomen. When the eggs are close to hatching, the females attach the capsule in a dark corner where the young can emerge safely. One female German Cockroach can produce up to 20,000 young annually.

### **Moths**

At Brisbane Terminator, we have 15 years of knowledge, experience, skill, high quality reputation and expertise in solving issues regarding pest inspection and removal. We offer our customers with regular pest inspection and annual pest treatment plans at an inexpensive rate.

Our pest management specialists are reliable, efficient and highly qualified in this field and they will make sure that you gain 100% satisfactory results after the treatment. We offer several bespoke treatment plans for pests like silverfish, termites, cockroaches, moths and many more. Although Moths are rarely seen but they cause a lot of damage if they invade into your living space. Our crew will provide you complete solutions for moth problems.

They will identify, target and examine the plot where moth infests and then they will use safe and eco-friendly products for the removal program. After the whole pest management program is done our crew will leave your home or business area exactly in proper shape.

### **Rodent Control Services**

Do you have a mouse or rat problem and don't know how to rid your home from those unwanted gnawers? Perhaps you've got possums in the ceiling, or invading your pantry? What you need is Termini-Nator's expert rodent control.

Rats and mice can make your life quite unpleasant. They reproduce rapidly and chew on cables, pipes, telephone wires and hoses. Their urine has a strong and unpleasant odour and they will leave droppings all around your home. They can track pathogens in to the home on their feet and through their droppings, causing health problems for all occupants of the

home. Standard control measures often don't work, or have unintended side effects such as the smell of decaying carcasses. If that sounds like something you would quite gladly be rid of, call Termini-Nator for outstanding rodent control services.

We offer our all of our clients friendliness, affordability and effective long term solutions. Our rodent control services are available to you in:

- Redbank Plains
- Booval
- Brassall
- Ipswich
- Raceview

...and across Brisbane.

Do you have any questions about our range of services? Would you like to book one of our experienced rodent control specialists for Raceview, Ipswich, Brassall, Redbank Plains, Booval or other parts of Brisbane? Then please do not wait to contact us now on 0427 022 070 or on 3201 4474. You can also use our quick and easy online request form to get in touch with us. Simply fill it out and we will answer your query as soon as possible.

## **Silverfish**

Brisbane Terminator is a well-established and reliable pest control service provider in Brisbane, Booval, Ipswich, Redbank Plains, Brassall and other parts of Queensland since 15 years. We provide you safe ,highly professional, effective and eco-friendly pest management services at an inexpensive rate according to your requirements for both residential and commercial areas.

We offer you with special silverfish control programs. Silver fish are wingless creatures they are usually found in basements, garages, bathrooms or any other cool , dark and dusty places. Silver fish can cause a lot of inconvenience and nuisance as they may even destroy your valuable belongings if left unchecked for a longer span of time. So call us and get rid of silver fish or any other pests with the help of our hassle free pest control programs.
