

## Services

Gutter-Vac employs powerful vacuums with custom-built attachments that remove debris more effectively than any other cleaning method. Each vacuum unit incorporates 'wet-dry' technology so sludge and other wet materials pose no problem. And since the debris is removed into large drums, it is easily taken off site with no mess left behind.

Gutter-Vac's effective and comprehensive services are suitable for properties of all sizes. All of our services are backed with a satisfaction guarantee.

### Gutter guard installation

Gutter-Vac also installs gutter protection devices. Gutter-Vac's trained operators can recommend the right product for your property and install the product while cleaning your gutters. For more information about gutter guards visit [Gutter-Flow](#).
