Technology and the Environment

Beare Air maintains a progressive and innovative approach to utilising the latest technology in the refrigeration and air-conditioning industry. This approach is now especially important for the consumer, due to the very high price hikes in refrigerant gases and also the introduction of the carbon tax.

Beare Air focuses on providing all clients with environmentally friendly products, services and best practice procedures.

Beare Air is focused on reducing commercial, industrial and residential carbon impact and costs associated with refrigeration and cooling systems. Over time significant savings can be made by clients of Beare Air.

Marine Systems & Water Chillers

Beare Airs team of refrigeration, electrical mechanics and fitters specialise in complete installations and maintenance of air-conditioning, refrigeration, ice machines, and electrical systems on all types of vessels including Super yachts, charter boats, commercial, fishing and government vessels.

Beare Air understands the many variables associated with air-conditioning and refrigeration systems required for vessels that operate in a marine environment. Beare Air ensures refrigeration systems are set up to cater for changing water temperatures, water cleanliness, engine room temperatures and salt water environment in general. All while job execution plans are developed to account for access to vessels due to tides, weather conditions, deadlines for non durable products and vessel movement schedules.

Beare Air understands the importance of keeping your boat operational and at sea. We can work with you or the vessels engineer to develop detailed preventative maintenance schedules to ensure the vessels air-conditioning and refrigeration system is maintained appropriately and therefore reliable.

Residential Air Conditioning

Although Beare Air is no longer one man operation, we have never forgotten that it is our customers that make our business great! Therefore we will always offer the same personal service that clients enjoyed back in the days when Beare Air was a one-man operation.

When it comes to the smaller residential jobs, Beare Air provides competitive sales, service and installation for all residential, air conditioning and refrigeration requirements.

- Ducted A/C and Split A/C
- Relocate air-conditioning systems rental properties, storage, extensions and renovations.
