

Sunny Daze Lawn Care- Lawn Cutting & Garden Maintenance - Cranbrook

Lawn Cutting Guide

We all have to do it. Mowing and maintaining your lawn can be a difficult and time consuming process so here are some helpful tips to make the job easier and less stressful for you!

Setting your Lawn Mower to the recommended cutting height

You can eliminate weed growth and improve the health of your lawn if you follow the simple guide of cutting your grass at least 2-inch height

Long and Often

The Rule of thumb for any grass type is to cut at least one third off the grass. Cutting the grass too short will make your lawn prone to weed growth because of the soil exposure to sunlight.

Do not discard Grass Clippings

Grass clippings can serve as a good source of nutrients and nitrogen and fertilise the soil. This will cut down the need to buy fertiliser and can save you a great deal of money.

When you do not have time to maintain your lawn, you could always call for professional garden maintenance people who undertake the same for you.

For all your garden and lawn care need call Sunny Daze Lawn Care today 0467 555 520!
