

**Max's Handyman-
Home Repairs &
Maintenance - Brisbane
City**

Choosing the Right Handyman for You

Good handymen offer a variety of handyman services and can help you out with a lot of the smaller jobs where you need specialist tools or skills.

- ✓ **Ask your trusted friends, neighbours and family for a handyman referral. If you're struggling to find a good referral then it's time to look online and find a handyman you like the look of and has good reviews and testimonials.**
- ✓ **Research your handyman and look out for reviews and complaints from past clients**
- ✓ **Give the handyman a call and talk over your job. Ask about their specific experience in relation to the job, and how they might tackle it.**
- ✓ **Checking references is a powerful tool to ensure you get a good quality handyman.**

- ✓ **When a handyman is working in and around your home, make sure that they have some form of liability insurance in case of an accident.**
- ✓ **Some handyman charge per hour and some per job and add on the cost of any expenses later on. Make sure you avoid surprises by asking for a quote for the complete finished job upfront.**

Consider the advice above and you should find a good handyman in next to no time!
