- Pre-entry & exit repairs/Rental
- Carpet cleaning & flood restoration services
- Grounds maintenance
- Driveway pressure cleaning
- Tile & Grout cleaning
- Welding
- Pest Control
- Basic Plumbing, Electrical

Decking

If you want outdoor decking to enhance your love of the outdoor life, you should have an outdoor deck that extends the interior of your home to the exterior, in effect doubling your living and entertaining space.

CCR decks add beauty and value to any home or business, and are low maintenance, safe and durable. In creating your outdoor deck, we work with you to develop a proper space plan, allowing room for tables, chairs, barbeques, outdoor kitchens and other features you want for your deck. Special touches like built-in planters can be added to enhance the beauty of the landscape. Entertaining is made easy through the addition of custom seating built into the deck, and custom railings can be added to create the proper flow as well as for added safety.

Pergola

From gazebos to carports we can do just about anything to help beautify your garden and give you the outdoor living style that you want. CCR has built many different pergolas and can build any pergola design you need to suit your residence. We can help you size an existing pergola design, or interchange details to fit with your home perfectly.

Obtaining a unique pergola that compliments your home beautifully has never been so inexpensive or easy.

Polish Concrete

In simple terms, the process of polishing concrete is similar to sanding wood. Heavy-duty polishing machines, for example concrete grinder, are used to gradually grind down surfaces to the desired degree of shine and smoothness. The closest equivalent example would be polished granite or marble. Polished concrete floor installation is categorised into two types: new floors, and retrofit floors.

Glass Balustrades and Balconies

For a soft and sophisticated style and see-through effect, a side-mounted balustrade is very effective. Glass balustrade systems enable you to have a safe and secure balustrade with the brilliance of a nearly uninterrupted view.

Glass balustrades are ideal for that extra bit of style and functionality without compromising on safety and security.

Clean & Seal / High Pressure

Keep your pavers, limestone and concrete looking like new.

We can help you maintain the beauty and value of your property by preventing your pavers, limestone or decorative concrete surfaces from being ruined by unsightly oil, grease or food stains.

We can do this by applying a specially formulated deep penetrating sealer that will enhance the look of your paving, limestone or concrete. It works by penetrating below the surface to form an invisible protective barrier.

Oil, grease, dirt and food stains cannot penetrate through the sealer, they remain on the surface so that you can easily clean them off.

Polished Floors

Hardwood floors add beauty and charm to any home. A hardwood floor that is scratched, dented, or excessively worn can, likewise, take away from the beauty a home has to offer and

even decrease its worth. It's natural for a floor to become scuffed, marked, and worn over time. If you discover that your floor needs some additional TLC beyond normal cleaning, you may want to consider refinishing your hardwood floor.

Make Overs

Why not give your old Kitchen a makeover with friendly and reliable service, we can organise your job from start to finish with all trades needed.

Not only kitchens, but bathrooms and any other rooms that you feel needs revamping.

Other / Repairs

Facia boards in need of repair, your broken Airconditioners, ducts need replacing - this and so much more.

Bird need deterring - we can do all that.
