

# Prestige Pattern Paving

## Concrete Slab Paving

Prestige Pattern Paving The Experts In Decorative Concrete.

Exposed Aggregate Concrete, Stencil Concrete, Slate Impressions Concrete, Spray On Concrete Driveways and Entertaining areas.. Whenever the need for a concrete paved area exists, the opportunity to apply a decorative finish to the concrete is presented. Whether it be a driveway, BBQ, patio, entertaining area, carport, carpark or simply a pathway, exposed aggregate concrete, stencil concrete, slate impressions concrete are simply a modern decorative finish to the concrete itself, and they are designed to beautify and last the life of the concrete.

Even if you already have existing concrete in good condition we can apply a spray on paving to beautify the area, without altering the finished levels of the concrete any more than 5mm.

I invite you to browse my site; I am sure you will find it informative. I hope it helps you to decide the style of decorative concrete that suits your project.

Please do not hesitate to leave feedback, ask questions or request a free quotation we will endeavour to respond promptly.

I thank you for visiting; enjoy browsing my site and I look forward to your enquiries.

Regards,

David Clarke.

Exposed Aggregate Concrete Driveways, Slate Impressions Driveways, Stencil Concrete Driveways

### About Us

Prestige Pattern Paving has been servicing Melbourne since 1992. I have more than 35 years of concreting experience and specialise in exposed aggregate, slate impressions, stencil and spray on decorative concreting. I have been on the advisory committee for the Victorian Building and Construction Industry Training Board and helped produce standards in relation to domestic concreting. I have given many lectures at TAFE colleges and building display centers and taught concreting workers courses at a leading Victorian TAFE college. I take pride in my work, and remain passionate about my chosen trade.

### What's involved in a quote?

When quoting your job I will discuss the most critical factors of your proposed concrete area. The single most important factor is the final finish levels of your concrete. Second is the falls of the concrete, away from the house at all times and into garden beds or storm water pits and grates whenever possible. I will discuss with you the style of decorative concrete that suits your project, budget and required performance. Whether it be plain concrete, coloured

concrete, slate look concrete, stencil concrete, exposed aggregate concrete or spray-on over existing concrete.

I am a firm believer in recycling and your old concrete will be taken to a recycle depot whenever possible (let's reduce landfill). When a crushed rock base is required it will, whenever possible be provided in recycled crushed concrete.

Your concrete will be reinforced with the minimum of F62 fabricated steel reinforcing and placed on bar chairs prior to the pouring of the concrete. The concrete used will be a minimum of 25 mpa concrete and will be provided by a reputable ready mixed concrete company.

The colour hardeners, releasing agents, retarders and sealers used will again only be purchased from top quality reputable suppliers.

My total commitment to my clients is to provide a job of the highest possible quality that will stand the test of time.

**I DO NOT AND WILL NOT SACRIFICE QUALITY.  
THERE IS NO SUBSTITUTE FOR QUALITY.**
