Closed Circuit Television or CCTV is a great way of enhancing security at office/business premises. Get a notification via SMS or email and check HD images of any suspected activity in or around the property. Fill in our simple form outlining your business's security needs, and we will contact you shortly.

Choose The System

Choose from popular brands like Swann, Bosch, Hikvision or Dahua and choose CCTV solution tailored to your Business needs. We have the technical expertise and resources to install a broad range of high-quality CCTV Systems at your business even at the short notice.

Schedule Office or After Hours Installation

Call us to schedule your appointment at any time, seven days a week. We install & service a variety of commercial CCTV systems & provide you with uninterrupted services.

Home Security Alarm Systems

Do you find yourself constantly thinking if you have forgotten to lock the front door before going out of house? Do you keep worrying if you have properly closed the windows and chained the doors before going to sleep?

Stop worrying! With the increase of crime rate, it is not an exaggeration to feel worried and insecure. However, we believe that you have all the rights to feel safe and secure in your own home. Dhillon Networks can help you protect your home and your family. Our home security systems installation technicians are experienced in both wired and wireless alarm systems installation. All of our burglar alarm systems include motion detectors, control unit, command keypad and alerting medium of your choice. Varieties of alerting devices are also available, namely sirens, flashing lights and mobile phone calls.

Having security systems installed will ensure that you are notified whenever anyone suspicious come into your housing area. With request, we can also combine your home alarm systems with any other systems like CCTV surveillance systems and access control systems. This will ensure that your housing has extra layers of security against thefts and burglary.

Business Security Alarm Systems

At Dhillon Networks, we understand the need for business owners to protect their business premises while providing a secure working environment for their employees. It is really important to make sure that your business is safeguarded against any forms of theft, burglary and property damage. A secure workplace will also encourage employees to let their creative minds work without being disturbed by insecure thoughts.

Our business security alarm systems will give you and your employees the peace of mind that you deserve. Installing security alarm systems will allow you to detect any suspicious activity outside of regular working hours. This will include intrusion detection for unauthorised personals that may enter your business premises and gain access to sensitive areas of your business.

In addition to that, we can also install access control systems upon your request. As an extra layer of security, it is also possible to ask our technicians to help you with CCTV video surveillance systems installation in your business premises. Integration of CCTV and access control systems with our intrusion detection systems can be done, as long as you consult with our technicians beforehand.
