Painters & Decorators

RESIDENTIAL SERVICES

Interior House Painting

Interior painting requires thorough planning and careful preparation and is crucial to achieve the very best results. At Caulfield Painters we take pride in our attention to detail to give you immaculate results.

We recommend and use only the best products and materials such as Dulux, Wattyl, Haymes and Bristol. We recognise the importance of selecting the appropriate colour combinations for your house and recommend and supply the product best suited for your home. We use the new generation of acrylic paints as they are as durable as oil paints but dry at a much quicker rate, just as important is that they are kinder to the environment. The most significant benefit of these new acrylic paints is the reduced odor, which results in minimal disruptions to your family's lifestyle.

Exterior House Painting

Caulfield Painting set the gold standard in high quality painting. Exterior painting is critical to the finish of any home.

Professionally applied exterior painting work should protect the home from weather extremes as well as significantly increase your home's aesthetic and value. Careful surface preparation is vital to ensure a beautiful finish.

COMMERCIAL SERVICES

Caulfield Painters are the perfect choice for commercial painting. No job is too big or too small, our experienced professional painters can accommodate your every need. We take great pride in creating beautiful work spaces from restaurants, pubs & clubs, schools, churches, medical clinics to dentists, offices, apartments and shop fronts.

SPRAY PAINTING SERVICES

Our Commercial and Domestic Spray Painting Service leaves a finish that no brush or roller can compete with due to the even and smooth application in which the paint is applied from the spray gun to the surface. This makes this type of painting technique very effective when it comes to uneven surfaces, textured walls and other hard to paint areas. Probably the biggest advantage that spray painting has over the traditional brush and roller is the speed in which it can be completed.
