

# TREE FX PTY LTD

## Arborist

### Safe Tree Removal

Tree FX are experienced and extensively trained to carry out any tree removal job safely and efficiently. When planning a tree removal, our first priority is the safety of our staff our clients and the general public. Before any work commences a detailed Job Safety Analysis (JSA) will be carried out by all staff present, to ensure a safe, smooth and effective tree removal job is attained. Clients are welcome to be present for such discussions to ensure a successful outcome. Tree FX has the staff, equipment and training to tackle any tree removal task in any location.

All care will be taken to ensure no damage is done throughout the course of the tree removal. As qualified arborists, tree lovers and garden enthusiasts we also understand the concerns that many of our clients have about their gardens. At Tree FX we know that gardens, trees, and plants and even lawn areas can take many years to establish, so we take all due care to ensure very little if any disturbance is caused to any area around where a tree removal job is taking place. If in the case where disturbance is unavoidable then this will be discussed prior to the commencement of works (usually at the time of the quotation) to ensure an appropriate outcome is achieved. Our client's expectations are only ever surpassed by our own. We strive to complete all jobs with minimum fuss, to achieve a successful outcome and leave the job site in the same or better condition than how it was when we arrived.

### Tree Pruning

Tree FX carries out all tree pruning according to the Australian Standard: AS4373-2007 (Pruning of Amenity Trees) All trees are different and each tree requires a visual tree assessment by a qualified arborist to determine the most appropriate methods of pruning which will in turn achieve the desired result. There are many reasons trees may need pruning, some of which include:

- For safety such as removing dead wood or broken hanging branches.
- Removal of poorly attached branches or stems which may be a high risk of failing in high winds or storms
- Removal of damaged limbs or areas which could be entry points for pests and disease such as crossed or rubbing branches.
- Branch or tip pruning to maintain clearances for service lines and buildings.

These are just a few reasons why pruning maybe necessary. Tree FX can give you expert advice on the most appropriate course of action to gain you the result you desire. All tree pruning is carried out by qualified arborists with non-invasive climbing techniques using all the latest equipment. All Tree FX climbers can access and carry out all tree work without the use of climbing spikes.

### **Stump Removal**

Tree FX can safely and efficiently remove all stumps on your property no matter what size or in what location. With a range of stump grinding machines of all sizes we can assist you with any job. If it is part of a complete tree removal job, or an old unwanted stump that's been laying around for years we can have it removed.

### **Cabling and Bracing**

Tree FX can install static and dynamic bracing systems in trees where potential hazards have been identified. Whilst carrying out visual tree inspections our arborist can identify poor stem and branch unions or heavy over extended branches which may have the potential to fail. Installation of a suitable bracing system can prevent failure, and in the unlikely event where failure does occur the brace should hold the branch securely until it can be removed

safely without damage to persons or property.

### **Hazard Tree Assessments and Risk Management Strategies:**

Tree FX have highly trained arborists that can quickly and easily assess and identify hazards in your trees. Trees are an important and essential part of our urban environment and at Tree FX we can help achieve the balance in which we maintain our trees but also reduce or remove the risks to our safety. There are often many alternative methods that we can use to manage our trees around our houses and in our gardens. Often these alternatives are considerably cheaper than removing the trees. Things such as cabling and bracing, tree pruning, or simply moving paths or outdoor furniture away from the drop zone of the tree. At Tree FX we assess not only the trees, but the areas around the trees and then create strategies to remove or reduce the risks posed by the trees to you, your family and your home. Tree FX offers free hazard tree assessments.

### **Mulching Service:**

Tree FX offers a mulching/chipping service throughout the Eastern suburbs. With our range of trucks and chippers of different sizes, we can access all sites to chip any fallen trees, or branches as well as any trees and branches you may have cut yourself. All our clients are welcome to keep any mulch which is created from your job.

### **Possum Guarding:**

Possoms can be a real nuisance in Melbourne's suburbs and with increasing numbers possums can have a severe impact on the health of the trees in our gardens. Tree FX carries out possum guarding and can help reduce or prevent the movement of possums into your stressed trees. Not only do we install bands of plastic guard but we also identify where possums are moving from tree to tree and can prune trees to isolate them from neighbouring vegetation.

### **Wood Splitting:**

Tree FX offers a wood splitting service to quickly and easily turn the wood from your tree work into cut and split firewood. Firewood is very expensive so why not use the wood from your tree to heat you over the cold winter periods; this may even save you money on your tree work.

### **Site Clearance:**

Tree FX can tackle large site clearance jobs with ease. With access to a large range of machinery whether you have limited access, hilly terrain or a large site, Tree FX has the ability to get the job done right.

### **Consultancy:**

Tree FX has a consulting arborist that is used for all reports and consultancy. If you require a tree hazard and condition report to assist you with a tree removal application for council, or require detailed tree impact reports for development sites we can assist you with all your consultancy needs.

**Storm Damage:**

Tree FX provides assistance for all storm clean up and can give expert advice in the event of insurance claims and insurance related tree and storm clearance works. Contract Climbing: Tree FX provides expert Climbing arborists at competitive rates.

**Contract Climbers:**

Tree FX provides expert Climbing arborists at competitive rates.
