## Sewn-In WEFTS HAIR EXTENSIONS

Weaves are good for medium to thick hair. Weaves instantly add lots of volume and length. There are a variety of colours, lengths, and hair types (curly, wavy, straight) to choose from. Weaves that are hand made provides better flexibility into adding more hair without the feel of extra weight.

Extensions shed just like our natural hair. However, for wefts extensions; they do shed slightly more if not cared for properly. The good news is, hand made wefts have reduced this problem to about 95%. Wefts can be reused over and over again until they are worn out and consequently, a new row will need to be replaced or simply add more rows on top of old ones. 5 rows of hand tied wefts are equivalent to 2 rows of machine wefts, that is a lot of weight reduction. A person's real hair is cornrowed and the wefted hair is attached to the braids using weaving thread. This style can last up to 12 weeks with proper care and maintenance. Another advantage is that the real hair is protected from styling, manipulation, and the environment thus facilitating growth and length retention.

Thin tracks of hair are made and Sewn-In flatly across the scalp from left to right. Clients own hair is then left loose in between the tracks, creating a natural look. This method leaves clients hair looking really flawless.
