## LL Security

### Security Alarm Systems

Hi, my name is Matthew,

I am the owner and operator of LL security. I have lived on the central coast for most of my life and have decided to start my business here as I love the coast lifestyle.

I have over ten years' experience in electronic security, from alarm installations to CCTV and home automation.

I have a young family, so i know the importance of feeling safe in your home and business.

Please message or call me for a quote today!

Our Services  
Alarm Installation / Servicing

We will work with you to install a system that meets your needs.

We also service a wide variety of systems that are already installed, regardless of who they were installed by.

Intercoms

We install and service all intercoms, from single dwelling residential to multi storey with elevator access control.

We also do IP Intercom systems that can integrate with alarms, cameras and lighting.

Access Control

We have many options for access control; from intergrated solutions with your alarm and camera systems, to stand alone single door systems.

We also service all types of access control.

IP Camera Systems

It is a generic title, but the products, systems and capabilities of the different products is almost an industry on its own. We install systems to meet your needs and budget, while maintaining simplicity and thinking about the future of your system.

Not happy with yours? Need to upgrade?

Talk to us today!

Damaged Systems

If your system has been damaged in a storm, we can assess the system, advise you of your options and recommend the best one for you.

If the system needs to be claimed on insurance, we can provide paperwork to assist this process and quote for suitable replacement.

Most providers will also allow you to pay the difference should you wish to upgrade at the same time.

Proactive External Protection

We specialise in external protection that does more than just record what happens. Instead, it detects an event with a very low false alarm rate and initiates a response. You can even have it monitored by an offsite guard with police response so you're protected without even leaving your bed
