

AAA Market Services Pty Ltd

Business Brokers

Services

At AAA Market Services we have a team of professionals with more than 25 years of expertise and service in the financial markets. We compliment this with a number of partners and professionals we can call upon for specialist services.

We are committed in providing services and value. We are prepared to * invest our time in your business to help you realise your business objectives.

We can offer services more cost effectively than you may be able to do internally and get economies of scale you may not be able to obtain by internal resourcing. We are flexible in our service delivery and can customise our services for your business. We provide tailor made solutions, or services on a "no win no fee" basis, "as required", days per week, full time, contracted time or via a resource in blocks of 3 month intervals where you can mix and match the resources to your requirements.

AAA Market Services has the following Trading and Market data services that can enable your business to reduce costs, stream-line services delivery, add value to your bottom line and bring your Trading and Market Data services up to the next level:

- vendor negotiations

Here are some examples of our Consultancy Service:

- provide health checks for market data, trading systems & platforms, infrastructure, services, procedures and produce recommendations for any areas of concern.
- audit your market data services and identify opportunities for your company to save money on market data costs.
- provide independent opinions and guidance on problem areas within market data or trading systems.
- supply additional resources when and where they are required without effecting headcount to run or manage projects.

Outsourcing

Is where you employ AAA Market Services to provide the knowledge, experience and expertise to manage all or part of your service delivery.

We have a team of professionals with more than 25 years of expertise and service in the financial markets. We can offer services more cost effectively than you may be able to do internally and get economies of scale you may not be able to obtain by internal resourcing. We are flexible in our service delivery. We provide services on a cost and materials basis, contracted amount or we can customise a solution to your requirements. We can also mix and match resources to your requirements to supply the right resources for the right job.

Examples of our areas of expertise are:

- market data service delivery
- [invoicing and reporting](#)
- [inventory management](#)
- [market data cost reduction](#)
- platform design
- project management
- disaster recovery
- business continuity
- risk management

- system implementation
- market data relocations
- low latency trading
- vendor negotiations

Here are some examples of our Outsourcing Service:

- reduce costs by obtaining the economies of scale to efficiently and effectively manage your service delivery.
- down size the local office but still provide the on the ground support your customers require.
- cost effectively supply support where a full time position can not be justified.
- remove expensive head-counts from the books and replace them with expensed costs.
- take advantage of our expertise in market data to better manage your service delivery.

Support
