### **What To Do During Emergency Lock Out Situations**

**When you are faced with emergency locksmith situation such as being locked out of your car, home or office, you may not have the time to thoroughly check the locksmith companies. But try to find time searching about the locksmith business and don't panic.**

**Here are some simple tips to follow when you are in a locksmith emergency situation:**

- ✓ Call your Insurance Roadside Assistance service. This can be included in the membership or even a car dealership.
- ✓ Be suspicious of companies with generic business names such as "Locksmith Services". When they give you an 800 number to call, this is most probably an off-shore call centre. If the customer representative cannot answer your call, call another locksmith.
- ✓ Make sure to have an estimate of all the work and replacement parts before you get the work begun. Look out for additional fees before you agree for the locksmith to come to your location.
- ✓ Your property can be damaged during the work, so it's important for the locksmith to have insurance to cover the losses.
- ✓ Look for Licensure and Accreditation to ensure that you are hiring a reliable and skilled locksmith.
