Pest Control Services in Sydney are much needed due to the vast range of insects and rodents that have established themselves around the area. We are certified and carry all the necessary certificates to ensure we can exterminate whatever rodent, bird or insect problem you have.

Domestic, Enterprise and Commercial Cockroach Control

The risk for cockroach infestation is pretty scary including hookworm, tape worm, viruses and in some people asthma attacks and allergies.

Prevention includes keeping your home including floors meticulously clean, no food scraps or leaks etc. keep holes and cracks covered.

Cockroaches also emit an odour/chemical this is why you will generally find more than one cockroach in an infested area as the chemical is emitted to entice more cockroaches to an area.

In order to control cockroaches in Sydney it is best to hire a professional in order to find less obvious hiding places and to ensure a pest control operation is put in place.

Due to the warmer climate in Sydney the cockroach's problem is harder to control, they love warmer areas and are attracted to areas where they feel warmth mainly in kitchens and storage areas.

Species of Cockroach:

1. German Cockroaches
2. American Cockroach
3. Australian Cockroach
4. Brown Banded Cockroach
5. Oriental Cockroach

Ensure you call the experts in the industry. We carry all the required licences and also off a 100% Guarantee that the work we carry out is as effective as you expect.
