#### Mobile broadband & TV reception: The link

With mobile broadband services a high priority for both communities and providers, the ACMA is aware of the rollout of a significant number of new base stations across Australia over the next few months. This will improve mobile coverage and enable high-capacity services, but there may be flow-on effects to TV reception in some areas.

While this is unlikely to affect most viewers, some people living near mobile base stations may experience reception difficulties following the rollout due to 'receiver overload'. This is not a new problem and is an inherent risk whenever high-power radiocommunications services (such as mobile telephony base stations) are established in frequencies nearby to those used by TV services.

#### Do you have customer service?

Of course! Our friendly and knowledgeable customer services reps are available to answer your questions 0800am ESDT till 0500pm ESDT.
