

Turbo Handyman- Home Repairs & Maintenance - Newcastle

How to Find a Good Handyman Service

Sourcing a reliable handyman isn't always as easy. Typically you lack the time with a lot of tasks around the house that need to be done.

Here is a list of tips to find you a good handyman service.

Source your handyman

A good referral can come from friends, neighbours and family for a handyman service. You can also look at your online directory.

Screen and qualify the handyman

Look out for reviews and complaints from past clients. Any contractor which has multiple bad reviews online, will likely to get you disappointed as well.

Get in touch with the handyman

Give the handyman a call and talk over your job. Ask about their specific experience in relation to the job, and how they might tackle it.

Ask for and contact references

Checking references is a powerful tool to ensure you get a good quality handyman.

Check for insurance

If the handyman has liability insurance, the insurance company should take care of it. Avoid awkward situations by making sure the handyman you hire has insurance.

Terms of Payment

Make sure you avoid surprises by asking for a quote for the complete finished job upfront.

The average person can truly benefit by finding a quality handyman in their local area to help them out with projects around their home.
