#### About us

Accredited Asbestos removal experts with years of experience in testing, inspection, removal and disposal of Asbestos related materials. Competitive pricing solutions for all clients

When it comes to domestic or commercial asbestos removal in Melbourne and Victoria, you need to call in the expert to take care of it. Asbestos, if left untreated in your home, can be detrimental to your health and that of your loved ones or your employees.

Our team here at work safe asbestos removal understand the huge health risks that the presence of asbestos presents. It is now known that prolonged inhalation of asbestos fibres can cause serious diseases such as mesothelioma, asbestosis and even lung cancer.

For these reasons, your safety is always our number one priority we've been effectively removing asbestos from homes and workplaces in Victoria for many years and our process is the safest and the most reliable in Victoria.

We're Class B asbestos removalists and we're licenced by Worksafe Victoria so you know you're choosing the best in the industry when hiring us.

Assuming that they've found traces of this hazardous mineral, the team will give you a quote and work to free your home or workplace of asbestos and make it safe place to be for your family or employees.

The process that we use is the most effective in the industry.

It's safe, it's sustainable and the result it provides is what makes us the best choice for residential and commercial asbestos removal in Melbourne and Victoria.

After the initial inspection, we'll know whether your home or workplace is safe or in need of our services from asbestos cement sheet, asbestos insulation removal, vinyl floor removal or old shed or granny flat and garage demolition.

Depending on where it's present and how bad the contamination is you might even need to avail of all of these services.

**NOTE: Asbestos insulation removal is especially important if your home was built or renovated before the late-1980s so keep this in mind.**
